Pandas

Pandas are bears native to south central China. They are known for the large, black patches that they have around their eyes.

What do pandas look like?

There are two different types of pandas. The giant panda is the most well-known. Giant pandas are very big and have black and white fur. They have round bodies and have black patches around their eyes, over their ears and across their bodies. Red pandas have long tails and are roughly the same size as cats. Both types of pandas have long, sharp claws that they use to climb trees and strip bamboo.

A giant panda

What do pandas eat?

Pandas are quite fussy eaters! They normally eat bamboo, which is a type of grass. Most giant pandas will eat the equivalent of almost half their weight in bamboo every single day.

A panda eating bamboo

What do pandas do?

Pandas spend a lot of time eating and sleeping. They are not very active animals. Young pandas are very playful and enjoy playing with each other. They can be quite cheeky!

Did you know?

Pandas are vulnerable to extinction. This means we need to look after them so that they do not become extinct. There are about 2000 pandas living in the wild.
